

NUT SPLITTING

THE FAST, SURE AND SAFE METHOD TO REMOVE CORRODED SEIZED NUTS

The precision engineered cutting wedge of the tool ensures stuck nuts are quickly split open without causing damage to the threads

The tool utilizes a powerful, lightweight hydraulic cylinder to drive precision engineered cutting wedge into the flat of the nut. The cutting wedge, with 3 machined cutting edges has been designed for maximum life and minimum installation time.

FAST

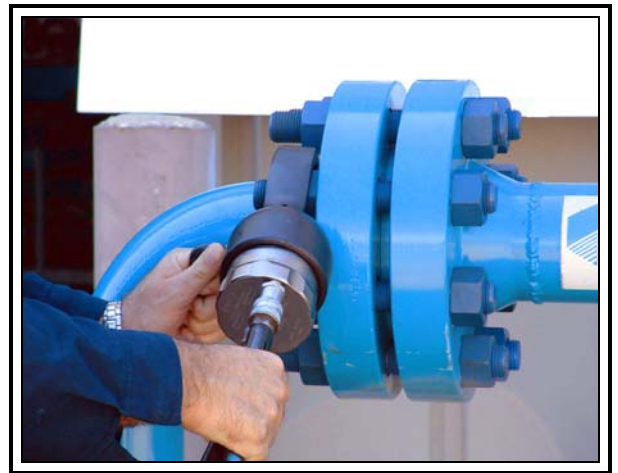

- Cuts 3-1/2" (5-3/8" A/F) nut in less than one minute

SAFE

- Eliminates burning, cutting or chiseling

CONTROLLED

- Precision cutting wedge design gives controlled penetration, preventing damage to stud and bolt threads

TOPSIDE or SUBSEA APPLICATIONS

Removing corroded or seized nuts is recurring problem faced by engineers. INTEGRA's Hydraulic Nut Splitters offer a reliable, effective solution for either Topside or Subsea applications

Dual Port Subsea Nut Splitter

Single Port Topside Nut Splitter
