

CONTROLLED BOLTING SERVICES

PROVIDING CERTAINTY OF OUTCOMESM

HYDRAULIC BOLT TORQUING SERVICES

- Qualified and experienced technicians with certified equipment
- Industry leading safety record
- Extensive tool inventory covering a wide range of bolting requirements
- Flange alignment and assembly capabilities, specializing in rapid breakout and make-up
- Extensive engineering specification development expertise
- Equipment is calibrated and tested before every job

HYDRAULIC TENSIONING SERVICES

- FASTER, BETTER, SAFER method of bolting
- Minimizes costs and downtime
- Ultimate in bolting safety by eliminating pinch points
- Greater accuracy in capturing desired bolt load targets
- Simultaneously applies clamping pressures for optimum gasket sealing
- Extensive tensioning tool inventory for a wide range of bolting needs

-
- **FlangeTrak** Leak-Free Flange Management Process
 - Proven construction and maintenance project experience
 - Third party verification quality control program

BOLT LOAD VERIFICATION SERVICES

- Verifies bolt load by measuring bolt stretch
- Instantly provides digitized readout of the true bolt load
- Provides guaranteed quality assurance on critical path connections
- Qualified and experienced technicians

HYDRAULIC NUT SPLITTING

- Fast-cuts large diameter nuts quickly
- Safe to both technician and asset integrity
- Precision cutting wedge for controlled penetration of galled nut
- Reliable effective solution for both Topside and Subsea applications
- Qualified and experienced technicians

RENTALS / PRODUCT SALES

TALON™ ART BOLT TENSIONERS

FAST. ACCURATE. SAFE.

SAFETY

- Bolt Tensioning offers the ultimate in safety for the operator.
- Not only is it a hands-free technology, but in the unlikely scenario of the tool yielding, it will not result in an oil strike. The TALON™ ART will internalize the lost oil.

FAST

- Provides a minimum of 25% time savings vs. bolt torquing.
- Only 2 passes when tensioning a flange, versus 30% /60%/100% when torquing.
- Avoid unnecessary delays: the TALON™ ART eliminates the chance to gall the threaded fasteners.

POWER

- TALON™ ART reaches a higher yield than other tensioning tools.

UNIQUE SIZING

- TALON™ ART's come in unique and large sizes, such as 4.5" +

HIGH TEMPERATURE APPLICATIONS

- TALON™ ART are built to withstand higher temperatures than your average tensioning tool.
