

# RENTALS

PROVIDING OUR CLIENTS WITH TOTAL JOINT INTEGRITY™

## ELIMINATE COST CREEP FROM BOLTING EQUIPMENT RENTALS

For one set price, INTEGRA Technologies can provide all necessary bolting equipment rentals for your work scopes in one convenient onsite trailer. No more paying for the same equipment three times over from multiple contractors.

All onsite personnel can rent fully calibrated equipment from the trailer and you get a certified FlangeTrak™ Daily Report overviewing who used it, calibration records, and any other information you require. Throughout all shifts, the INTEGRA personnel located in the trailer will be available to provide any calculations, pump pressures, and repairs to the equipment.

The equipment rental trailer comes in a basic package with all necessary torque wrenches, pumps, sockets, and ancillary equipment. Or you can customize a trailer to meet your exact equipment needs all for one set price. No more surprises at the end of the job.
